# Mobile Inventory Management

At Clear Spider, we are always looking for ways to give our customers more. We were the first to put our inventory system on the cloud, and we are continuing to lead innovation with our mobile app. Clear Spider already offers clients a powerful backend system, mobile scanning, and cloud-based access. Our mobile app brings these elements together in a user-friendly way. Inventory management on-the-go has never been simpler.

# Overview

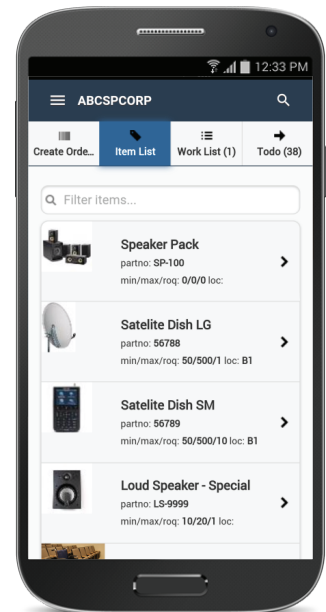

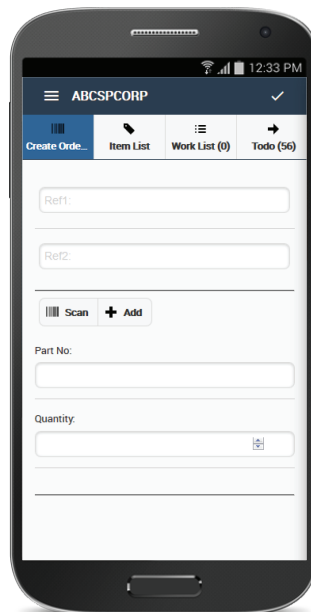

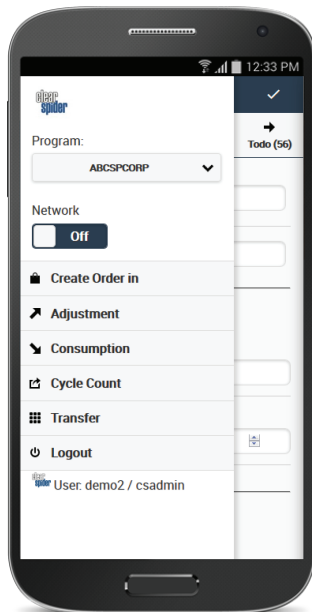

Clear Spider creates a better way for you to manage inventory. Our mobile app pairs an intuitive front end application with our powerful and reliable back end system. Don't sacrifice having a robust inventory management system for the convenience of mobile access. With the Clear Spider Mobile App, you can have both.

Setting up a mobile inventory management system is as simple as installing an app on your smartphone. Clear Spider has one of the most powerful cloud-based inventory management systems on the market. Our mobile app connects you to the inventory management system in a user-friendly way.

The mobile app is highly leveraged off our back end system to provide clients with a seamless flow of information. All inventory data stored on the main system is fully accessible through a smartphone. Check stock levels quickly, create new orders, or consume items on-the-go. Updates are posted immediately to the main system to ensure information is always up-to-date.

# Features

## Work Offline

The Clear Spider Mobile App's offline mode allows users to work even when there is no network connection. This is done by storing a local database of inventory information directly on the phone. As offline transactions are completed they are recorded to the phone. Once a connection is established data is posted to the system.

## Quick Scan

Record transactions and scan items using your smartphone camera. Through the use of Clear Spider technology and QR codes, scans are completed quickly even in suboptimal conditions. Our app is optimized for medium to light scanning with regular smartphone cameras. Scanner add-ons can be used to accommodate higher frequency scanning.

## Full Visibility

Access inventory information from anywhere, at anytime. The Clear Spider Mobile App connects to our cloud-based system to push and pull information. Create orders, record cycle counts, and check inventory levels even when you're out of the office. This level of visibility allows for further collaboration and enhanced communication within your organization.

# Intuitive Design

Available for Android (version 4.4 or higher), iOS (version 9.0 or higher), and BlackBerry.

# Functions

## Consume

Record inventory usage through your mobile device to keep the system up-to-date.

## Item Lookup

Our partial search function makes it easy to look up items by name or part number.

## Transfer Items

Record location transfers right when they happen to keep inventory data accurate.

## Fill Orders

Receive shipments by using your mobile device to confirm what items were delivered.

## To-do List

See the status of all current orders, or filter them by number or their current stage.

## Transaction History

A two-day log is stored on the device so you can review previous transactions on-the-go.

## Create Order

Place new orders directly from your mobile device, or set them to be approved at a later time.

## Cycle Count

Scan inventory items and key in item quantities to perform cycle counts on your smartphone.

## Offline Mode

Continue to work on the mobile app even when there is no network connection.

## Check Levels

The item list lets you see inventory at any location and how much is available.

## Adjustment

Reconcile discrepancies right away by recording item adjustments from your smartphone.

## Barcode Scan

Use your smartphone camera to scan items for efficient data entry and other transactions.

# Business Applications

## Customer Managed Inventory

The Clear Spider mobile app is an effective way to facilitate customer-managed inventory. Customers can download our mobile app to conveniently access their vendor's inventory system, allowing them to update their inventory quantities and place orders directly to the system from their smartphone. Both organizations will always have the most up-to-date information.

### Benefits

#### Convenient System Access

Access the Clear Spider system anywhere, at anytime from a compatible smartphone.

#### Intuitive User Interface

The mobile app's simple design makes it easy to learn and use.

#### Real-Time Updates

Transactions are posted to the system as soon as they are made on the mobile app.

## Vendor Managed Inventory

Cut back on time and paperwork with the Clear Spider mobile app. Vendors can use the app when visiting customer locations to directly access their inventory system on-the-go. They can perform cycle counts, place orders, and review performance metrics right from their smartphone. Updates are made directly to the system so no paperwork is required when you get back to the office.

### Benefits

#### Reduce Human Error

Transactions are done directly in the system, reducing the chance of transfer error.

#### Efficient Customer Visits

Everything you need to update inventory levels and create orders is all in one place.

#### Data Readily Available

All inventory data is easily accessible through the mobile app in a user-friendly way.

# Business Applications

## Field Service Inventory Management

Managing your inventory on the go has never been easier. Clear Spider gives field service staff the freedom to access inventory information at anytime from anywhere. Using their own personal smartphone or a company provided device, technicians can view inventory levels, edit orders, record transfers, and more.

### Benefits

#### Increased Visibility

The mobile app allows technicians to quickly look up inventory details and levels at any location.

#### Transfer Efficiency

Transactions are posted directly to the system, reducing the chance of a transfer error.

#### Paperless Record Keeping

All records are kept digitally in the Clear Spider system and can be accessed and printed at any time.

## Sales Representatives

The Clear Spider mobile app is all sales representatives need to be fully equipped. Quickly browse a detailed item catalog with up-to-date inventory levels. Place an order on the go by entering in an item code or quickly scanning a barcode. Our mobile app is an all in one tool for inventory management on-the-go.

### Benefits

#### Go Paperless

Transactions are recorded to the system through the mobile app and can be accessed or printed at any time.

#### Improved Organization

All data is accessible in one place. Check inventory levels, review orders or browse items all from your smartphone.

#### On-The-Go Orders

The mobile app's offline mode allows orders and other transactions to be made even with no network connection.

Today, over 100,000 companies use Clear Spider on a daily basis.

The Clear Spider mobile app connects you to one of the most powerful inventory systems in the world. Our strong back-end system is cutting edge and incomparable to other companies. Paired with a user-friendly mobile front end, using our system is as simple as installing an app.

Clear Spider makes managing inventory easy.
