WHO NEEDS INVENTORY MANAGMENT?

A REAL EXAMPLE

Inventory Management is necessary for those who need to collaborate with business partners, whether they are suppliers, customers, or within the own organization. You can simplify tasks by providing the current status of an order and more. In the example below we move an order easily from sales to fabrication, to lay down yard to assembly.

LET'S BEGIN!

YOUR COMPANY 'TOWER MOBILE'
MANUFACTURES AND SELLS
CELLULAR TRANSMISSION TOWERS

Your number one sales repreceives an order from Indonesia for 200 towers.

ORDER PLACED

ORDER PROCESSED

3

Drawings for these towers and the fabrication instructions need to be made available as inventory items to your manufacturer in China.

You'll need to know when the parts for the towers have been fabricated and have them bar coded individually.

UNITS
ASSEMBLED

ORDER SHIPPED

With the visibility an inventory management system provides you'll have access to your manufacturer's warehouse to see when the items are completed, picked, packed, and shipped.

When the items arrive in Indonesia they can be delivered to the appropriate lay down yard and scanned into inventory.

ORDER DELIVERED

ORDER

ORDER

COMPLETE

You will know exactly when the complete order of towers has been delivered.

This will allow you to send out your Missouri installation team at just the right time, saving you additional dollars in travel and set up charges.

PRODUCT INSTALL

You minimized costs by making the most effective decisions based on information received by your inventory management system, and most importantly, you made your customers happy.

If your business deals with a processes similar to this, then a collaborative inventory management system is the most cost-effective way of doing business and increasing productivity. It's time you consider the advantages and decide what's right to help push your business forward.
